Cannabis: Evolution and Ethnobotany By Robert Clarke, Mark Merlin

Cannabis: Evolution and Ethnobotany is a comprehensive, interdisciplinary exploration of the natural origins and early evolution of this famous plant, highlighting its historic role in the development of human societies. *Cannabis* has long been prized for the strong and durable fiber in its stalks, its edible and oil-rich seeds, and the psychoactive and medicinal compounds produced by its female flowers. The culturally valuable and often irreplaceable goods derived from *cannabis* deeply influenced the commercial, medical, ritual, and religious practices of cultures throughout the ages, and human desire for these commodities directed the evolution of the plant toward its contemporary varieties. As interest in *cannabis* grows and public debate over its many uses rises, this book will help us understand why humanity continues to rely on this plant and adapts it to suit our needs.

Editorial Review

Review

"This well-written work will be useful for freshmen through seniors in higher educations. Researchers and teachers will also find it extremely helpful, and it will intrigue even casual readers."

(L Swatzell *CHOICE Magazine* 2014-03-01)

"A valuable reference."

(Quentin Groom *Plant Ecology and Evolution* 2014-03-23)

"Sure to entertain any cannabis fan."

(Mitch Earleywine *High Times* 2014-04-01)

"Clarke and Merlin have crafted a volume in which each chapter can easily stand alone and will be accessible to a wide range of readers."

(*The AAG Review OF BOOKS* 2014-05-14)

From the Inside Flap

"The authors boldly demonstrate their capacity to survey both the biological evolution and widely varied human cultures' uses of cannabis. In doing so, they have produced a work that is thorough, globally ambitious, and carefully constructed. The extraordinary power and range of their cross-cultural perspectives are likely to elicit fresh consideration of familiar studies." —Richard Tucker, School of Natural Resources and Environment, University of Michigan

"*Cannabis* is one of the best, if not the best history of the extraordinary plant *Cannabis sativa* that I have read. It is encyclopedic in its scope, painstakingly documented, and well written. A must for libraries, cannabis scholars and the growing number of readers who are interested in this remarkable plant." —Lester Grinspoon, Emeritus Associate Professor of Psychiatry at Harvard Medical School and author of *Marihuana Reconsidered* and *Marihuana, the Forbidden Medicine*

"This is a unique and valuable work. It aptly summarizes the voluminous literature on cannabis to bring the reader a better understanding of its origins and uses, as well as the relationship with man, its chief employer and manipulator. The authors' experience in the subject makes them uniquely qualified to synthesize and interpret the material in a coherent manner." —Ethan Russo, President of the International Cannabinoid Research Society

About the Author

Robert C. Clarke is Cannabis researcher and Projects Manager for the International Hemp Association in Amsterdam and the author of *Marijuana Botany* and *Hashish!*

Mark D. Merlin is Botany Professor at University of Hawai'i at Manoa and author of *On the Trail of the Ancient Opium Poppy*.

Users Review

From reader reviews:

Lisa Bates:

The book Cannabis: Evolution and Ethnobotany can give more knowledge and also the precise product information about everything you want. Why must we leave a very important thing like a book Cannabis: Evolution and Ethnobotany? A few of you have a different opinion about e-book. But one aim in which book can give many details for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or facts that you take for that, you can give for each other; you are able to share all of these. Book Cannabis: Evolution and Ethnobotany has simple shape however you know: it has great and massive function for you. You can search the enormous world by wide open and read a reserve. So it is very wonderful.

Daphne Shew:

People live in this new time of lifestyle always attempt to and must have the time or they will get lot of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read is Cannabis: Evolution and Ethnobotany.

Michael Canton:

Is it you who having spare time after that spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Cannabis: Evolution and Ethnobotany can be the respond to, oh how comes? A fresh book you know. You are thus out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these ebooks have than the others?

Marie Slaughter:

Some individuals said that they feel bored stiff when they reading a reserve. They are directly felt it when they get a half parts of the book. You can choose the particular book Cannabis: Evolution and Ethnobotany to make your reading is interesting. Your own personal skill of reading ability is developing when you including reading. Try to choose basic book to make you enjoy to learn it and mingle the opinion about book and examining especially. It is to be initially opinion for you to like to open up a book and study it. Beside that the publication Cannabis: Evolution and Ethnobotany can to be your brand-new friend when you're really feel alone and confuse with what must you're doing of the time.
