ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook

By Jonas Fagerberg

ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook By Jonas Fagerberg

This book is primarily aimed at developers who have some prior experience with MVC 5 and are proficient in C#, since the language won't be explained in any detail. Even if you already have created a couple of MVC projects, you might find the content in this book useful as a refresher. You might have worked in previous versions of Visual Studio and MVC and want a fast no-fluff way to get up to speed with MVC 5. Prerequisites: • C# (you need to be proficient) • MVC 5 (you need some prior experience) • HTML5/CSS3 (you need basic knowledge) • JavaScript/JQuery (you need basic knowledge) In this book you will learn how to build an MVC 5 website using C#, Entity Framework, HTML5, CSS, JavaScript and Ajax. • Create a "real world" code-first database using Entity Framework. • Add and modify models, views and controllers to perform CRUD operations against the database. • Use client-side and server-side validation. • Secure the controllers, actions and view content with authorization and roles. • Implement security with ASP.NET Identity (authentication, authorization and roles). • Use JavaScript, JQuery and Ajax to build a great end-user interface with asynchronous server calls. • Style the user interfaces using CSS3 and Bootstrap. • Create a responsive website. • Implement product subscription scenarios with registration codes. • Create an alternate way to login to the application. • Implement password reset functionality. • Register users with the site. • Manage users and their subscriptions. Technologies, frameworks and languages: • C# (you need to be proficient) • HTML5/CSS3 (you need basic knowledge) • JavaScript/JQuery (you need basic knowledge) • MVC 5 (you will create/modify models, views and controllers) • Razor syntax (to include server-side code in views) • Bootstrap (used for styling and to create a responsive design) • Ajax (used for asynchronous server calls) • LINQ (to query the database) • Extension methods (to clean up your C# code and enable re-use) • HTML Helper methods (to clean up your HTML and enable re-use) • Use settings from the web.config file * This book does not cover ASP.NET Core 1.0 I hope you love the book! Sincerely, Jonas Fagerberg Now click the Buy button to start reading the book.

Editorial Review

About the Author
Jonas started a company back in 1994 focusing on education in Microsoft Office and the Microsoft operating systems. While still studying at the university in 1995, he wrote his first book about Widows 95, as well as a number of course materials. In the year 2000, after working as a Microsoft Office developer consultant for a couple of years, he wrote his second book about Visual Basic 6.0. Between 2000 and 2004, he worked as a Microsoft instructor with two of the largest educational companies in Sweden. First teaching Visual Basic 6.0, when Visual Basic.NET and C# were released, he started teaching those languages, as well as the .NET Framework. He was also involved in teaching classes at all levels for beginner to advanced developers. From the year 2005, Jonas shifted his career towards consulting once again, working hands-on with the languages and framework he taught. Jonas wrote his third book C# programming aimed at beginner to intermediate developers in 2013, and in 2015, his fourth book C# for beginners - The Tactical Guide was published. Jonas has also produced a 24h+ video course titled MVC 5 – How to build a Membership Website which can be found at Udemy, showing in great detail how to build a membership website.

Users Review

From reader reviews:

David Jones:

The book ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook gives you the sense of being enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting pressure or having big problem together with your subject. If you can make reading through a book ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook to be your habit, you can get more advantages, like add your own capable, increase your knowledge about several or all subjects. You can know everything if you like available and read a guide ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook. Kinds of book are several. It means that, science reserve or encyclopedia or some others. So , how do you think about this e-book?

Maria Ives:

In this 21st centuries, people become competitive in every way. By being competitive right now, people have do something to make these people survives, being in the middle of the actual crowded place and notice by surrounding. One thing that at times many people have underestimated the idea for a while is reading. That's why, by reading a book your ability to survive enhance then having chance to stand up than other is high. For yourself who want to start reading a new book, we give you that ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook book as starter and daily reading book. Why, because this book is usually more than just a book.

Clarence Lowery:

Nowadays reading books become more than want or need but also work as a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The details you get based on what kind of guide you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one having theme for entertaining for instance comic or novel. Often the ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook is kind of e-book which is giving the reader unstable experience.

Kaye Hensley:

Reading a book for being new life style in this season; every people loves to go through a book. When you learn a book you can get a lots of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, along with soon. The ASP.NET MVC 5 - Building a Website with Visual Studio 2015 and C Sharp: The Tactical Guidebook will give you a new experience in reading through a book.
