**Architectural Model Building: Tools, Techniques, and Materials** By Roark T. Congdon

Advances in computer-aided design have proven to be an invaluable tool for the architect and designer, yet Frank Gehry still begins his creative process by making "simple" models out of modest materials. Drawings and video, while an essential part of the design process, are still not substitutes for the tactile sensation one receives from a scale model. Drawing on 20 years experience in art and architecture, the author has developed this book on model making as it applies to students and professionals of the built environment. More than 300 photographs illustrate a multitude of techniques and the use of a wide variety of materials, providing a solid foundation for students and professionals to create and enjoy three-dimensional model making for interior design, architecture, landscape architecture, furniture design, theatrical design, and retail merchandising.

**Robert Jackson:**

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just tiny students that has reading's spirit or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading is not important, boring as well as can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Architectural Model Building: Tools, Techniques, and Materials can make you experience more interested to read.
