Wireless Power Handbook: A Supplement to GaN Transistors for Efficient Power Conversion Second Edition By Michael A. de Rooij

This second edition comes less than a year following the release of the first edition this is the pace at which the understanding and application of wireless power transfer is moving. Cut the cord is the battle cry and now that we know it can be done, what s holding us back, let s pick up speed and get on with it!

The scope of this second edition has expanded to include the latest work on A4WP class 2 and class 3 transmitters, adaptive tuning, radiated EMI, multi-mode wireless power systems, and control strategies. There are also systems demonstrated using the latest in eGaN FETs and integrated circuits that set new efficiency benchmarks as well as reduce system costs.

There is still much more to accomplish as this fast moving technology evolves; the purpose of this second edition is to share the latest information on the subject.

Editorial Review

About the Author

Dr. Michael A. de Rooij is the Vice President of Applications Engineering at Efficient Power Conversion Corporation (EPC) headquartered in El Segundo, CA.

Prior to joining EPC, he worked at Windspire Energy Inc., in the capacity of Director of Product Development where he helped develop the next generation of small vertical-axis wind turbine inverters.

From 2002 to 2008, Dr. de Rooij worked as a Senior Engineer at the GE Global Research Center, located in Niskayuna, NY. Before joining GE, Dr. de Rooij conducted Post-Doctoral studies on power electronic integration, packaging and high-frequency MOSFET gate driver at the Center for Power Electronic Systems (CPES) at the Virginia Polytechnic and State University. From 1998 through 2000, he was employed in the capacity of senior designer at IMV Victron in Groningen, The Netherlands, where his duties included the design of single-phase uninterruptible power supplies in the power range of 600 VA through 10 kVA.

Dr. de Rooij received his Ph.D. from the former Rand Afrikaans University (now known as the University of Johannesburg), South Africa in 1998. He is a Senior Member of the IEEE and is the author and co-author of over 25 international publications. Dr. de Rooij most recently co-authored *GaN Transistors for Efficient Power Conversion*, a textbook on gallium nitride technology. In addition, he has been granted 21 US and International patents and 19 US and International pending patent applications.

Dr. de Rooij's research interests and activities include wireless power transfer, solid-state high-frequency power converters and devices, uninterruptible power supplies, integration of power electronic converters, power electronic packaging, induction heating, photovoltaic converters, Magnetic Resonance Imaging (MRI) Systems, RF amplifiers and gate drivers with protection features.

Users Review

From reader reviews:

Juanita Hernandez:

Now a day people that Living in the era exactly where everything reachable by connect with the internet and the resources included can be true or not involve people to be aware of each data they get. How many people to be smart in obtaining any information nowadays? Of course the solution is reading a book. Studying a book can help individuals out of this uncertainty Information especially this Wireless Power Handbook: A Supplement to GaN Transistors for Efficient Power Conversion Second Edition book since this book offers you rich info and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it as you know.

Carlos Pollard:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic

within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the book untitled Wireless Power Handbook: A Supplement to GaN Transistors for Efficient Power Conversion Second Edition can be excellent book to read. May be it might be best activity to you.

Sylvia Dozier:

Many people spending their moment by playing outside using friends, fun activity together with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, ya think reading a book can definitely hard because you have to take the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smart phone. Like Wireless Power Handbook: A Supplement to GaN Transistors for Efficient Power Conversion Second Edition which is getting the e-book version. So , try out this book? Let's notice.

Robert Cox:

With this era which is the greater individual or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple solution to have that. What you should do is just spending your time almost no but quite enough to have a look at some books. One of the books in the top listing in your reading list will be Wireless Power Handbook: A Supplement to GaN Transistors for Efficient Power Conversion Second Edition. This book which is qualified as The Hungry Mountains can get you closer in turning into precious person. By looking upwards and review this e-book you can get many advantages.
