Editorial Review

About the Author

Raymond A. Serway (PhD, Illinois Institute of Technology) is Professor Emeritus at James Madison University. His honors and awards include an honorary doctorate degree from his alma mater, Utica College, the 1990 Madison Scholar Award at James Madison University, the Distinguished Teaching Award at Clarkson University in 1977, and the Alumni Achievement Award from Utica College in 1985. As Guest Scientist at the IBM Research Laboratory in Zurich, Switzerland, he worked with K. Alex Müller, 1987 Nobel Prize recipient. He was a visiting scientist at Argonne National Laboratory, where he collaborated with his mentor and friend, the late Sam Marshall. Dr. Serway is the coauthor of COLLEGE PHYSICS, Eleventh Edition; PHYSICS FOR SCIENTISTS AND ENGINEERS, Ninth Edition; PRINCIPLES OF PHYSICS, Fifth Edition; ESSENTIALS OF COLLEGE PHYSICS; MODERN PHYSICS, Third Edition; and the high school textbook PHYSICS, published by Holt McDougal. He has published more than 40 research papers in the field of condensed matter physics and has given more than 60 presentations at professional meetings.

John W. Jewett, Jr., earned his undergraduate degree in physics at Drexel University and his doctorate at Ohio State University, specializing in optical and magnetic properties of condensed matter. Dr. Jewett began his academic career at Richard Stockton College of New Jersey, where he taught from 1974 to 1984. He is currently Emeritus Professor of Physics at California State Polytechnic University, Pomona. Through his teaching career, Dr. Jewett has been active in promoting science education. In addition to receiving four National Science Foundation grants, he helped found and direct the Southern California Area Modern Physics Institute (SCAMPI) and Science IMPACT (Institute for Modern Pedagogy and Creative Teaching). Dr. Jewett's honors include the Stockton Merit Award at Richard Stockton College in 1980, selection as Outstanding Professor at California State Polytechnic University for 1991-1992, and the Excellence in Undergraduate Physics Teaching Award from the American Association of Physics Teachers (AAPT) in 1998. In 2010, he received an Alumni Lifetime Achievement Award from Drexel University in recognition of his contributions in physics education. He has given over 100 presentations both domestically and abroad, including multiple presentations at national meetings of the AAPT. Dr. Jewett is the author of THE WORLD OF PHYSICS: MYSTERIES, MAGIC, AND MYTH, which provides many connections between physics and everyday experiences. In addition to his work on PHYSICS FOR SCIENTISTS AND ENGINEERS, he is the coauthor for PRINCIPLES OF PHYSICS, Fifth Edition, as well as GLOBAL ISSUES, a four-volume set of instruction manuals in integrated science for high school. Dr. Jewett enjoys playing keyboard with his all-physicist band, traveling, and collecting antique quack medical devices that can be used as demonstration apparatus in physics lectures. Most importantly, he relishes spending time with his wife Lisa and their children and grandchildren.

Reading a publication tends to be new life style in this particular era globalization. With reading you can get a lot of information which will give you benefit in your life. With book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their

story as well as their experience. Not only the storyline that share in the ebooks. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write with their book. One of them is this Principles of Physics: A Calculus-Based Text.

Clorinda Combs:

Your reading 6th sense will not betray you actually, why because this Principles of Physics: A Calculus-Based Text guide written by well-known writer who really knows well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and producing skill only for eliminate your own personal hunger then you still skepticism Principles of Physics: A Calculus-Based Text as good book not merely by the cover but also by content. This is one publication that can break don't assess book by its cover, so do you still needing an additional sixth sense to pick this!? Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

Neil Dussault:

This Principles of Physics: A Calculus-Based Text is great guide for you because the content which is full of information for you who also always deal with world and also have to make decision every minute. This particular book reveal it information accurately using great plan word or we can declare no rambling sentences inside. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but difficult core information with attractive delivering sentences. Having Principles of Physics: A Calculus-Based Text in your hand like getting the world in your arm, data in it is not ridiculous a single. We can say that no book that offer you world in ten or fifteen small right but this reserve already do that. So , this can be good reading book. Hey there Mr. and Mrs. hectic do you still doubt that?

Nick Gulbranson:

Beside that Principles of Physics: A Calculus-Based Text in your phone, it could possibly give you a way to get closer to the new knowledge or info. The information and the knowledge you will got here is fresh from oven so don't end up being worry if you feel like an previous people live in narrow commune. It is good thing to have Principles of Physics: A Calculus-Based Text because this book offers to your account readable information.
