Cracking the IT Architect Interview By Sameer Paradkar

Key Features

- Learn about Enterprise Architects IT strategy and NFR – this book provides you with methodologies, best practices, and frameworks to ace your interview
- A holistic view of key architectural skills and competencies with 500+ questions that cover 12 domains
- 100+ diagrams depicting scenarios, models, and methodologies designed to help you prepare for your interview

Book Description

An architect attends multiple interviews for jobs or projects during the course of his or her career. This book is an interview resource created for designers, consultants, technical, solution, domain, enterprise, and chief architects to help them perform well in interview discussions and launch a successful career.

The book begins by providing descriptions of architecture skills and competencies that cover the 12 key domains, including 350+ questions relating to these domains. The goal of this book is to cover all the core architectural domains. From an architect's perspective, it is impossible to revise or learn about all these key areas without a good reference guide – this book is the solution. It shares experiences, learning, insights, and proven methodologies that will benefit practitioners, SMEs, and aspirants in the long run.

This book will help you tackle the NFR domain, which is a key aspect pertaining to architecting applications.

It typically takes years to understand the core concepts, fundamentals, patterns, and principles related to architecture and designs. This book is a goldmine for the typical questions asked during an interview and will help prepare you for success!

What you will learn

- Learn about IT strategies, NFR, methodologies, best practices, and frameworks to ace your interview
- Get a holistic view of key concepts, design principles, and patterns related to evangelizing web and Java enterprise applications
- Discover interview preparation guidelines through case studies

- Use this as a reference guide for adopting best practices, standards, and design guidelines
- Get a better understanding with 60+ diagrams depicting various scenarios, models, and methodologies
- Benefit from coverage of all architecture domains including EA (Business, Data, Infrastructure, and Application), SA, integration, NFRs, security, and SOA, with extended coverage from IT strategies to the NFR domain

About the Author

Sameer Paradkar is an enterprise architect with 15+ years of solid experience in the ICT industry which spans across consulting, systems integration, and product development. He is an Open Group TOGAF, Oracle Master Java EA, TMForum NGOSS, IBM SOA Solutions, IBM Cloud Solutions, IBM MobileFirst, ITIL Foundation V3 and COBIT 5 certified enterprise architect. Editorial Review

Review
This artifact is a gold mine of concepts, fundamentals, patterns and principles related to architecture and designs that is typically discussed during an interview. This book also tackles the NFR domain which is the key aspect to be addressed while architecting applications. There is always a dire need to look up and read multiple books and references before these interviews / discussions but artifact will make you stay on top of things. A must have reference for architects practitioners.

The book is a great reference for IT architecture practitioners and The coverage is extensive in terms of depth and breadth of a domains addressed in the title. The book can be selectively read based on the relevant domains. The questions have a probability indicator for all questions. Probability indicator depicts the likely hood of the questions or topic coming up in the discussion. There is a section on advisory domain which is hard to find and is generally a product of years of extensive experience.

Users Review

From reader reviews:

Harriet White:

Spent a free a chance to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they carrying out activity like watching television, going to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Can be reading a book can be option to fill your free time/ holiday.
