**Engineering Design: An Introduction** By John R. Karsnitz, Stephen O'Brien, John P. Hutchinson

ENGINEERING DESIGN: AN INTRODUCTION, Second Edition, features an innovative instructional approach emphasizing projects and exploration as learning tools. This engaging book provides an overview of the basic engineering principles that shape our modern world, covering key concepts within a flexible, two-part format. Part I describes the process of engineering and technology product design, while Part II helps develop specific skill sets needed to understand and participate in the process. Opportunities to experiment and learn abound, with projects ranging from technical drawing to designing electrical systems--and more. With a strong emphasis on project-based learning, the book is an ideal resource for anyone interested in preparing for success in an engineering career.

### Editorial Review

#### About the Author

John R. Karsnitz, Ph.D., is professor and chair of the Department of Technological Studies in the College of New Jersey's School of Engineering, where he coordinates the Professional Studies and Technological Design strand. His teaching emphasizes multimedia, architectural, and civil engineering design, as well as technology education, while his primary research interests include technological literacy in general education, pre-engineering, and STEM education. In addition to authoring several textbooks and presenting at many state and regional conferences, Dr. Karsnitz is an active member of several professional organizations. His current affiliations include the International Technology Education Association (ITEA), the Council on Technology Teacher Education (CTTE), the New Jersey Technology Education Association (NJTEA), and the New Jersey Engineering Education Council (NJEEC). Dr. Karsnitz earned B.S. and M.Ed. degrees from Millersville University and a Ph.D. from The Ohio State University.

Following a successful career in electrical engineering, in 2006 Stephen O'Brien, Ph.D., joined the faculty of The College of New Jersey, where he is an associate professor of technological studies in the School of Engineering. He also coordinates the Electrical Engineering Design strand and is director of the college's Center for Excellence in STEM Education. His teaching focuses on engineering math, analog circuits, digital electronics, robotics and controls, and advanced engineering design. Dr. O'Brien's scholarly work includes over 40 publications and 13 patents, primarily in the field of optoelectronic devices, as well as frequent presentations at national professional conferences. His research interests include the efficacy of STEM training and education, as well as interdisciplinary work combining humanities, engineering, and technology. He earned a B.S. in math and physics from Western Washington University and an M.S. and Ph.D. in electrical engineering from Cornell University.

John Hutchinson is an emeritus professor in the Department of Technological Studies at The College of New Jersey. He holds a Ph.D. from the Pennsylvania State University and has authored books on Design and Problem Solving in Technology and Designing with Pro/DESKTOP. Dr. Hutchinson taught at the high school, community college, and college level for more than 35 years. During his tenure, Dr. Hutchinson worked closely with colleagues from the United States, United Kingdom, Germany, and other countries in design and technology curriculum development.

### Users Review

#### From reader reviews:

#### Viola Hassell:

What do you concerning book? It is not important to you? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy man? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every person has many questions above. They should answer that question simply because just their can do that. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this Engineering Design: An Introduction to read.

**Philip Logan:**

This Engineering Design: An Introduction book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book will be information inside this guide incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This Engineering Design: An Introduction without we understand teach the one who reading it become critical in contemplating and analyzing. Don't always be worry Engineering Design: An Introduction can bring once you are and not make your carrier space or bookshelves' turn into full because you can have it inside your lovely laptop even mobile phone. This Engineering Design: An Introduction having good arrangement in word in addition to layout, so you will not experience uninterested in reading.

**Franklin Crossland:**

People live in this new moment of lifestyle always attempt to and must have the free time or they will get great deal of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is Engineering Design: An Introduction.

**Gerard Norman:**

Many people spending their time period by playing outside with friends, fun activity with family or just watching TV all day every day. You can have new activity to spend your whole day by reading through a book. Ugh, you think reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Engineering Design: An Introduction which is obtaining the e-book version. So , why not try out this book? Let's find.
