Editorial Review

About the Author

A prolific and influential scholar known to believers and skeptics alike as “the father of modern creation science,” Dr. Henry M. Morris truly was a man of science and a staunch man of God. He was even said to have set the terms of debate about evolution for the second half of the 20th century by one Pulitzer Prize-winning academician. Dr. Morris began his serious study of the Bible in the 1930s and authoring books in the 1940s, but it was his landmark work, co-authored with Dr. John Whitcomb, titled *The Genesis Flood* in 1961 that influenced generations to begin discovering the fallacies of evolution and the biblical truth of creation.

With over 60 books, founding and leading the Institute for Creation Research (ICR), Dr. Morris’ death in 2006 was a profound loss to millions.

Dr. Morris created a thriving legacy that continues to equip many Christians to be able to defend the accuracy and authority of Scripture today. This study bible and other resources that he developed remain an essential source of knowledge and understanding for believers.
